- *Market participants since 2014*
- *Having own apiaries*
- *Expanding honey product line*
- *Packing honey in containers from 20 g to 300 kg*
- *Experience in exporting honey to 11 countries*

# Scheme of purchasing and processing

## The process of production

<b>Purchase of honey</b>	➤ Delivery honey directly from beekeepers or from own apiaries (see map below) ➤ Evaluation of organoleptic properties ➤ Documentary check ➤ Control of falsification
<b>Quality control of raw honey</b>	➤ Laboratory control (own methods RANDOX, test stripes IFA) ➤ Physico-chemical control (moisture, color, diastase number; oksimetylfurfurol, pH, conductivity, pollen) ➤ Control the presence of polluting materials
<b>Heating honey</b>	➤ Recrystallization of honey in a special heat chamber to condition of adequate ductility ➤ Filing the line homogenization
<b>Mixing honey, homogenization process</b>	➤ Homogenization of honey
<b>Quality control of finished products</b>	➤ The output control of finished products in our own laboratory ➤ Quality control of finished products involving independent European laboratories (INTERTEK, QSI)
<b>Filling and Packaging</b>	➤ Filing honey to packaging: - into the plastic containers - into the metal drums - into the glass jars (TWIST OFF) - into the stickers
